

Clark Forklift

Clark Forklift Forklift Training - Performing globally, there are at this time 350,000 Clark forklifts and lift vehicles in operation, with upwards of 250,000 of those in service in North America. Clark has five major lines of lift trucks across the globe, making it one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 unique designs of forklifts, with parts covering more than 120,000 particular items for all of its automated equipment. Your local Clark Dealer is your complete source for availability of all your parts requirements provided by Clark Totalift.

Clark features a phenomenal Parts Distribution team. The components warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to ensure exceptional service to both their buyers and their dealers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to supply the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to enhancing efficiency and benefiting performance.

Globally, Clark has one of the most impressive supplier support networks. With over 550 locations globally, dealer representation in over 80 nations and 230 locations in North America, their high level of dedication to their customers predominates the materials handling market.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of refinement in the industrial equipment and automated forklift industry. This exceptional commitment to safety is now a customary feature on every forklift.

Clark's continual effort to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck producer across the globe to be certified with the internationally accepted quality standard ISO 9001 for each and every one of their production plants. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any number of environmental limitations, thus placing them in a dominant industry position.

Lean Production

Clark has selected the structure of "Lean Manufacturing" at all of its assembly facilities for the reason that this system is particularly economical and permits minimal use of resources. Established to guarantee maximum proficiency, this system is designed to discover and acknowledge the most effective ways for production facility stewardship. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Engine Design

By working in concert, Clark's product suppliers and engineers communicate towards enhancing product proficiency while minimizing costs. The contemporary value engineering program combines innovative product growth and offers superior client support and service within the industry.
